the shell
feel free
monch002
release 15/03/2006

letting go – it needs trust to hold on. «the shell» hold on to their ideals – without compromise, rocking and with the love for musical experiments. uk producer «phil vinal» (placebo, pulp, radiohead) produced together with the band the new album «feel free». the shell show their talent with mature arrangements and intelligent rock. the album stands on a high quality level and still provides cutting edges – chaotic, with a concept, intuitive and brute tenderness – it's unique for a swiss independent act.
